

Milestones

Established in September 2000, Shanghai Model Organisms Center Inc. has stayed true to its commitment to gene editing and the decoding of the language of life. Through our focus on the field of model organisms and our specialization in R&D, breeding and analysis of genetically-engineered animal models, we provide universities, research institutes, hospitals and pharmaceutical companies across the world with comprehensive, convenient and professional technical services and model resources.

Milestones

Founding of Shanghai Model Organisms Center in Sep. 2000

Established the R&D base for animal models of disease (biotechnology field) with support from the "863" program directed by the Ministry of Science and Technology in Nov. 2000

Completed construction of SPF animal rooms and embryo micro-manipulation experimental facilities in 2001

Successful generation of 1st SMOC transgenic mice in 2002

Successful generation of 1st SMOC knockout mice in 2003

Included as one of the first R&D public service platforms in Shanghai in 2007

Establishment of zebrafish research platform in 2008

Establishment of C. elegans research platform in 2010

Recognized as Shanghai Professional Technical Service Platform for Animal Models in 2011

Recognized as Shanghai High and New Technology Enterprise (HNTE) in 2011

Recognized as Shanghai Engineering and Technological Research Center for Animal Models in 2012

Obtained AAALAC accreditation in 2012

Recognized as Shanghai Professional Technical Service Platform for Comparative Medicine in 2015

Series A funding in 2015

Transformed into a joint-stock company and renamed as Shanghai Model Organisms Center, Inc. in Jun. 2016

Completed NEEQ listing, stock code 839728 in Nov. 2016

Recognized as Shanghai Science and Technology Little Giant Enterprise in 2017

Brand upgrading in 2018

Establishment of preclinical efficacy evaluation service platform in 2019

Series B funding in 2020

SMOC(stock code:688265) launched into SSE STAR Market in 2021
