

Pvalb-Flox

Nomenclature	C57BL/6Smoc- <i>Pvalb</i> ^{em(flox)/Smoc}
Cat. NO.	NM-CKO-220526
Strain State	Sperm cryopreservation

Gene Summary

Gene Symbol Pvalb	Synonyms	PV; Pva; Parv
	NCBI ID	19293
	MGI ID	97821
	Ensembl ID	ENSMUSG000000005716
	Human Ortholog	PVALB

Model Description

These mice carry loxP sites flanking exon 3 of Pvalb. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Pvalb gene.

*Literature published using this strain should indicate: Pvalb-Flox mice (Cat. NO. NM-CKO-220526) were purchased from Shanghai Model Organisms Center, Inc..
