

Msln-Flox

Nomenclature	C57BL/6Smoc- <i>Msln</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Msln	Synonyms	MPF
	NCBI ID	56047
	MGI ID	1888992
	Ensembl ID	ENSMUSG00000063011
	Human Ortholog	MSLN

Model Description

These mice carry loxP sites flanking target exons of Msln gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Msln gene.

*Literature published using this strain should indicate: Msln-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
