

Draxin-Flox

Nomenclature	C57BL/6Smoc- <i>Draxin</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Draxin	Synonyms	neucrin, 2610109H07Rik
	NCBI ID	70433
	MGI ID	1917683
	Ensembl ID	ENSMUSG00000029005
	Human Ortholog	DRAXIN

Model Description

These mice carry loxP sites flanking target exons of Draxin gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Draxin gene.

*Literature published using this strain should indicate: Draxin-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
