

Cfdp1-Flox

Nomenclature	C57BL/6Smoc- <i>Cfdp1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Cfdp1	Synonyms	Bcnt, Cfdp, cp27, AA408409, Bucentaur
	NCBI ID	23837
	MGI ID	1344403
	Ensembl ID	ENSMUSG00000031954
	Human Ortholog	CFDP1

Model Description

These mice carry loxP sites flanking target exons of Cfdp1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Cfdp1 gene.

*Literature published using this strain should indicate: Cfdp1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
