

Myf5-Flox

Nomenclature	C57BL/6Smoc- <i>Myf5</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Myf5	Synonyms	Myf-5, bHLHc2, B130010J22Rik
	NCBI ID	17877
	MGI ID	97252
	Ensembl ID	ENSMUSG00000000435
	Human Ortholog	MYF5

Model Description

These mice carry loxP sites flanking target exons of Myf5 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Myf5 gene.

*Literature published using this strain should indicate: Myf5-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
