

HCC1937

Strain Information

Cat. NO.	NM-R08
Cell Line	HCC1937
Strain State	Validation of tumorigenic capacity completed
Model Description	The HCC1937 cell line is derived initially from the mammary gland of a 23-year-old Caucasian female with breast carcinoma that is associated with genetic predisposition.
	*Literature published using this strain should indicate: HCC1937 cell line (Cat. NO. NM-R08) was purchased from Shanghai Model Organisms Center, Inc..

Validation Data

A

B

Fig1. Analysis of Tumorigenesis in M-NSG mice (n=5) . a Tumor volume was measured by time.
b Body weight was simultaneously checked.

*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
