

Arx-Flox

Nomenclature	C57BL/6Smoc- <i>Arx</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Arx	Synonyms	Arx1
	NCBI ID	11878
	MGI ID	1097716
	Ensembl ID	ENSMUSG00000035277
	Human Ortholog	ARX

Model Description

These mice carry loxP sites flanking target exons of Arx gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Arx gene.

*Literature published using this strain should indicate: Arx-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Disease Connection

Early Infantile Epileptic Encephalopathy	Phenotype(s)	MGI:3844352 Note: The expected phenotype(s) may be observed in the above-mentioned mice that bred with mI56i-cre mice.
