Model Description

Apoe-KO(2) mice (Stock No.NM-KO-190565) carry a knockout allele derived from the targeted deletion of exon 2-4. While Apoe-KO mice (Stock No.NM-KO-00033) have been pulled from shelves for some reasons.

Research Application: Atherosclerosis,hyperlipidemia,hypercholesterolemia,cerebral infarction,AD,chronic hepatitis etc.

*Literature published using this strain should indicate: Apoe-KO(2) mice (Cat. NO. NM-KO-190565) were purchased from Shanghai Model Organisms Center, Inc..
