

Raji

Strain Information

Cat. NO. NM-B07

Cell Line Raji

Strain State Validation of tumorigenic capacity completed

Model The Raji line of lymphoblast-like cells was established by R.J.V. Pulvertaft in 1963

Description from a Burkitt's lymphoma of the left maxilla of an 11-year-old Black male.

*Literature published using this strain should indicate: Raji cell line (Cat. NO. NM-

B07) was purchased from Shanghai Model Organisms Center, Inc..

Validation Data

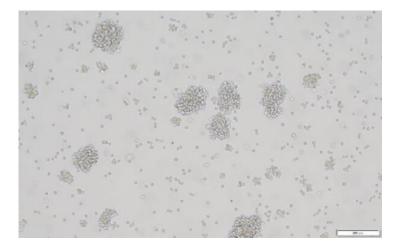

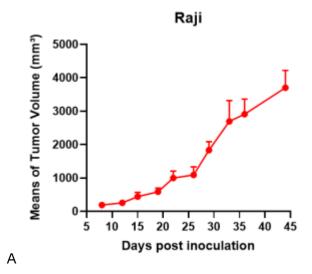

Fig1. Morphology of Raji cell line.

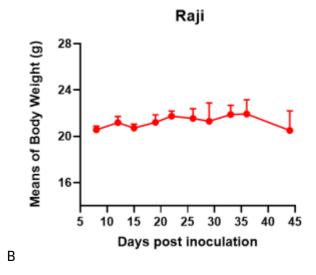

Fig2. Analysis of Tumorigenesis in M-NSG mice (n=5). A Tumor volume was measured by time. B Body weight was simultaneously checked.

*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
