## Model Description

A 2A-CreERT2 expression cassette was knocked into the Eno2 gene stop codon site.

**Research Application:** Eno2-2A-CreERT2 mice express the tamoxifen inducible creERT2 in the nervous system. CreERT2 mediated recombination can also be detected in the muscle.

\*Literature published using this strain should indicate: Eno2-2A-CreERT2 mice (Cat. NO. NM-KI-200011) were purchased from Shanghai Model Organisms Center, Inc..

## Validation Data
